

Restaurant Picker

The Restaurant Picker app is designed to make choosing where to eat easier. Using an interactive menu, choose your price range from cheap, middle, and expensive. Then choose what type of food from another menu. You can choose from things like pizza, Mexican, buffet, and more. When you're ready, click the button to find out where you should go. The app will randomly pick a restaurant that fits your requirements, then display your recommendation. The app has many of the most popular restaurants in Red Bank, so you have a broad range of options. Bon appétit!
